auricwings13@gmail.com | +91 782-775-6669

PROFESSIONAL SUMMARY

IIT-Bombay EE graduate (B.Tech, 2019-2025) with hands-on AI/ML engineering experience across multimodal ML, AI-assisted development workflows, and data-driven marketing intelligence tools. Shipped production ML systems, and reduced development timelines via AI-augmented methodologies. Versatile problem-solver leveraging interdisciplinary knowledge to drive innovative solutions.

Python | TensorFlow | Scikit-learn | Pandas | NumPy | MediaPipe | SQL | JavaScript | HTML | Microsoft Azure | Git | System Design | NLP | Computer Vision | Deep Learning | REST APIs

WORK EXPERIENCE

Lead AI Engineer

Mar 2026 – May 2026

HypeOn

- Architected a cross-market AI forecasting tool that pinpoints trending keywords and creative assets, enabling data-informed marketing strategies across multiple geographies.
- Delivered a 30% increase in ROAS across a diverse client portfolio via strategic campaign optimization, audience segmentation, and data-driven targeting.

AI/ML Engineer

Dec 2025 – Mar 2026

NimitAI

- Engineered multimodal machine learning models to assess client engagement levels by fusing facial expressions, speech cues, and acoustic features into a unified engagement signal.
- Developed cost-efficient AI solutions via AI-assisted development, cutting token expenditure by up to 60% without compromising model quality.
- Leveraged AI-augmented development workflows to reduce production timelines by 85% vs traditional engineering methodologies.

EDUCATION

B.Tech., Electrical Engineering

2019 – 2025

IIT Bombay, India

- Core Coursework:** Programming, Data Science, Machine Learning, Web Development, System Security, Probability, Statistics, Cryptography, Neuromorphic Engineering, Technical Communication.

AISSE – Class XII

2019

Modern Delhi Public School

93%

AISSE – Class X

2017

Modern Delhi Public School

CGPA 10/10

PROJECTS

Falcon-9 Launch Success Prediction

2025

- Designed an automated data acquisition system using the SpaceX API and web scraping to build an optimized training dataset for orbital launch forecasting.
- Built and refined predictive ML models to forecast launch success probabilities, leveraging high-dimensional feature sets to drive data-informed decision-making.

Supervised Research Exposition – Contactless Biometric Verification

2023

- Developed affordable, contactless biometric verification prototypes within a collaborative research environment spanning multiple academic tiers.
- Conducted an in-depth feasibility study and benchmarking of emerging contactless biometric techniques to inform R&D direction and downstream prototyping.

SKILLS

- Languages & Tools:** Python, SQL, HTML, JavaScript, TensorFlow, Pandas, MediaPipe, Microsoft Azure, Git, Cursor, Claude, Gemini
- ML & AI:** Regression, Classification, SVM, KNN, Clustering, Decision Trees, Random Forest, XGBoost, PCA, Neural Networks, CNN, RNN, Hyperparameter Tuning, Reinforcement Learning
- Data Science:** Web Scraping, Preprocessing, EDA, Feature Engineering, User Segmentation, NLP, Data Visualization, Predictive Analytics, Data Storytelling
- Foundations:** Data Structures & Algorithms, System Design, AI-assisted Development, Technical Communication, Data Analysis, Creative Problem Solving, Logical Reasoning, Professional Ethics

CERTIFICATIONS

ML/AI Specialization

2025

DeepLearning.AI

- Supervised ML, Unsupervised ML, Deep Learning, Computer Vision, CNN, RNN, Recommender Systems, Collaborative Filtering, Content-Based Filtering, Anomaly Detection.

Data Science Professional Certificate

2025

IBM

- Web Scraping, Data Wrangling, Feature Engineering, Interactive Visualization, Predictive Analytics, AI-assisted Data Science (Prompt Design, Prompt Refining), REST APIs.

ACADEMIC ACHIEVEMENTS

- AIR 262 in JEE Mains 2019.
- AIR 413 in JEE Advanced 2019.
- NTSE Scholar – National Talent Search Examination, 2017.
- NCR Rank-1 in the Aryabhata Inter-School Mathematics Competition, 2015.
